Feel the difference

Made in Japan, Primado2 is NSK's second generation high speed total surgical system developed to keep up with demand from surgeons.

Since the launch of the first generation of Primado in 2006, we have been working with surgeons across the world. Their needs and requests gave shape to the new Primado2 which we created with balance, power, and a lightweight design to prevent stress from long operating hours.

We invite you to experience Primado2 – the next evolution of high speed drills.

FEEL THE DIFFERENCE

Made in Japan, Primado2 is NSK's second generation high speed total surgical system developed to keep up with demand from surgeons.

Since the launch of the first generation of Primado in 2006, we have been working with surgeons across the world. Their needs and requests gave shape to the new Primado2 which we created with balance, power, and a lightweight design to prevent stress from long operating hours.

We invite you to experience Primado2 – the next evolution of high speed drills.

Primado2 makes it possible

to conduct various types of procedures.

New features include a control unit with LCD display touch screen, a multifunctional foot control, four lineups of motor and extensive attachments. Since all Primado2 motors and handpieces are thermo disinfectant compatible, easy maintenance is achievable.

Primado2 Control Unit

The control unit has a new 6.5 inch LCD screen and a simple design that makes it user friendly.

Two motors can be connected to the unit simultaneously, allowing for quick and easy switching between motors.

order code

P200-CU-120

Primado2 Control Unit for 120V

- Power Supply : AC120V 50/60 Hz
- Dimension : W278 x D268 x H160 (mm)
- Weight : 6.9 kg

Settings

Extensive options are available

Control Unit

- Brightness • Volume
- Language (English, Japanese, German, French, Spanish, Italian)

Motor Handpiece

- Accelerator adjustment (min. 10% - max. 100%)
- Brake adjustment (min. 10% - max. 100%)
- Torque adjustment (min. 30% - max. 100%)
- Oscillation adjustment (1- 5 times, available only for Wire Pin Driver)

Attachment

- Handpiece selection
(Displays rotation speed of engaged handpiece)

Touch Panel

Main Panel

- Speed control
- Irrigation control
- Reverse rotation control
- Priming control

Sub Panel

- Displays the assigned function of each

Mini Panel

- Button for optional settings.

Configuration Settings

The control unit saves the configurations made by the last user except for speed, allowing the surgeons to proceed quickly.

Automatic Recognition for Motors

Four types of motor are automatically recognized by the control unit which displays the corresponding models and rotation speed for each.

Integrated High Performance Irrigation Pump

Primado2 comes equipped with an irrigation pump. Irrigation is adjusted up to a max of 75ml/min.

Primado2 Foot Control

The foot control is available in two models: single (one functional button), and multi (three functional buttons). Each button can be set to a specific function to meet the operator's preference.

Functional Options

<Allocatable Features>

- Foot control ON/OFF
- A ⇌ B control (switching between motors)
- Speed control
(adjust rotational speed; min. 30% ⇒ default ⇒ max. 100%)
- Reverse rotation mode
- Irrigation ON/OFF
- Flush (continuous 100% irrigation when pressed)
- Disable (Set the status as no function)

order code
FC-73

Primado2 Single Foot Control

- 1 pedal with 1 functional button
- Speed control : variable
- IP rating: IPX8

order code
FC-74

Primado2 Multi Foot Control

- 1 pedal with 3 functional buttons
- Speed control : variable
- IP rating: IPX8

Slim Motor Series

- Slim Design** : A compact and lightweight design reduces surgeon fatigue during long operations.
- High Speed** : High speed rotation with a maximum of 80,000min⁻¹ ensures precise cutting.
- Versatile** : Foot control and hand control options available.
- Easy Maintenance** : All motors and handpieces can be processed by a thermo disinfecter.
- Durable** : The Slim Motor Series features a durable design as a result of NSK's long history with high precision technology. The wear-resistant coating contributes to long-lasting and scratch-free products of the high quality.
