Please contact us for more information (See back cover)

The outer sheath and the 15cm dilator tip are covered with hydrophilic coating for providing ease during insertion.

The new intelligent pressure control module eliminates the need to use the thumb.

Stone Collector
Used for collecting stones during surgery

The access sheath can be bent with the ureterscope to enter the renal calyces and reach the stones to maximize stone - removal efficiency.

Commence Suction While Stones Are Being Fragmented
